

While I support this proposal in general I believe that the Communicator class operator should be restricted further.

1. 1.800 - 2.00 Extra and General
2. 1.975 - 2.00 Communicator, 100W limitation
3. 3.600 - 4.000 Extra
4. 3.700 - 4.000 General
5. 3.900 - 4.000 Communicator, 100W limitation
6. 7.050 -7.300 Extra
7. 7.100 -7.300 General
8. 7.250 - 7.300 Communicator, 100W limitation
9. 10.125 - 10.150 Extra and General (200W limitation)
10. 14.050 - 14.350 Extra
11. 14.100 - 14.350 General
12. 14.300 -14.350 Communicator, 100 W limitation
13. 18.100 -18.168 Extra and General
14. 21.100 - 21.450 Extra
15. 21.200 - 21.450 General
16. 21.400 - 21.450 Communicator, 100W limitation
17. 24.900 - 24.990 Extra and General
18. 24.980 - 24.990 Communicator, 100W limitation
19. 28.100 - 29.700 Extra and General
20. 29.550 - 29.700 Communicator, 100W SSB, 50W FM Limitations

Also restrict Communicator class operator phone privileges to 50 watts FM above 50 MHz.

Testing should also be improved:

- 1.Improve the question pools in regards to questions about band plans
- 2.Improve the question pools in regards to RFI and harmful emissions
- 3.Improve the question pools in regards to power restrictions
- 4.Insure Communicator class question pool contains topics about enforcement, fines and license revocation for violating privileges
